forma®

Design by: Emanuele Bertolini

Forma® è una collezione con Design Comunitario Registrato.

Forma® is a collection with Registered Community Design.

Avvolgente e dalle linee tese, la collezione di poltroncine Forma è ideale per i mercati contract e residenziale. La scocca in plastica è disponibile in 6 diverse colorazioni e può essere abbinata ad un'ampia gamma di basi.

With its enveloping shape and sharp lines, the Forma armchair collection is ideal for both contract and residential markets. The plastic shell is available in six different colors and can be paired with a wide range of bases.

La collezione Forma presenta una gamma completa di varianti di scocca: una in plastica a vista, adatta anche all'uso esterno, e due versioni tappezzabili in poliuretano. Tra le scocche in poliuretano, una mantiene il caratteristico foro della scocca in plastica, mentre l'altra offre un design più pulito senza di esso, entrambe queste versioni sono progettate esclusivamente per essere tappezzate.

The Forma collection features a full range of shell variants: one in exposed plastic, also suitable for outdoor use, and two upholsterable versions in polyurethane. Of the polyurethane shells, one retains the characteristic plastic shell hole, while the other offers a cleaner design without it; both of these versions are designed exclusively for upholstery.

Per enfatizzare il comfort della seduta, sono disponibili accessori dedicati per ogni tipo di scocca. Per la scocca in plastica è disponibile un pannello di legno che può essere imbottito e tappezzato. Per le due scocche in poliuretano, è previsto un morbido cuscino, pronto per essere imbottito.

To emphasize seating comfort, dedicated accessories are available for each type of shell. For the plastic shell, a wooden panel is available to be padded and upholstered. For the two polyurethane shells, a soft cushion is provided ready to be upholstered.

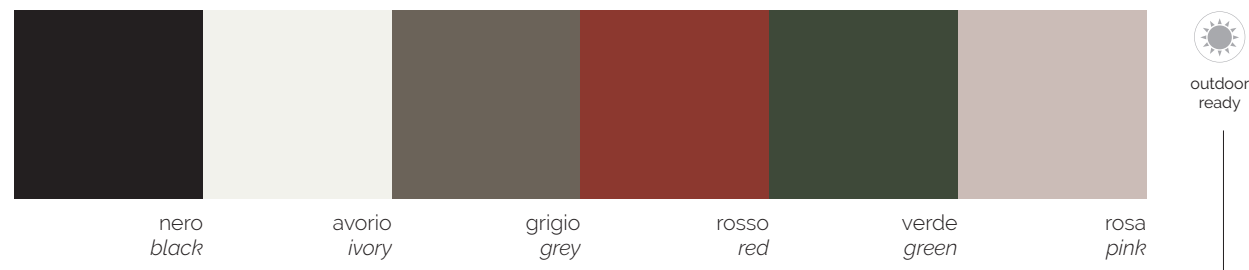

Tutte le varianti di scocca possono essere installate anche su travi panca, offrendo soluzioni versatili per spazi collettivi e aree di attesa.

All shell variants can also be installed on bench beams, offering versatile solutions for community spaces and waiting areas.
