Sedia e sgabello pensati per il mondo contract, ideali per contesti residenziali o collettivi: Jota è una collezione dal design riconoscibile, capace di coniugare estetica contemporanea e funzionalità.

Le diverse configurazioni di telaio, abbinate a una ricercata palette colori e ad una essenziale selezione di finiture, permettono a Jota di integrarsi con facilità e naturalezza in qualsiasi ambiente. Le scocche sono proposte in tecnopolimero in quattro tonalità, o in Bio-lolla.

A chair and stool designed for the contract world, ideal for residential or collective settings: Jota is a collection with a recognizable design, capable of combining contemporary aesthetics and functionality.

The different frame configurations, combined with a rich color palette and an essential selection of finishes, allow Jota to integrate easily and naturally into any environment. The shells are offered in technopolymer in four colors, or in Bio-lolla.

La versione 4 gambe è certificata EN16139.
The 4-leg version is EN16139 certified.

Le scocche sono realizzate in plastica riciclata certificata, disponibili in tutte le varianti colore della collezione.

The shells are made from certified recycled plastic and are available in all the colors of the collection.

Jota **chair**

Nella versione sedia, Jota è disponibile con due telai distinti: un classico telaio a quattro gambe, essenziale e funzionale, e il telaio Elegance, caratterizzato da un'unica curva continua che definisce con precisione la forma e lo sviluppo lineare del tubo metallico. Un segno fluido che racconta il know-how progettuale dell'azienda e dona alla struttura solidità e leggerezza visiva. Il risultato è una seduta compatta, impilabile, disponibile anche con braccioli.

Le scocche di schienale e sedile sono disponibili in quattro varianti colore – nero, grigio, verde e rosso – oppure in Bio-lolla nella finitura naturale.
Per una maggiore personalizzazione possono essere anche tappezzate.

In the chair version, Jota is available with two distinct frames: a classic four-leg frame, essential and functional, and the Elegance frame, characterized by a single continuous bend that precisely defines the shape and linear development of the metal tube. A fluid sign that tells of the company's design know-how and gives the structure solidity and visual lightness. The result is a compact, stackable seat that is also available with armrests.

The backrest and seat shells are available in four color options – black, gray, green and red – or in Bio-lolla in a natural finish.
For added customization, they can also be upholstered.

Jota **stool**

La collezione di sedute Jota si completa con la versione sgabello.
Le scocche dello schienale e del sedile trovano posto su un classico ed elegante telaio a quattro gambe con poggia-piedi, disponibile in due altezze.

The Jota seating collection is completed with a stool version.
The back and seat shells find a place on a classic and elegant four-leg frame with footrest, available in two heights.

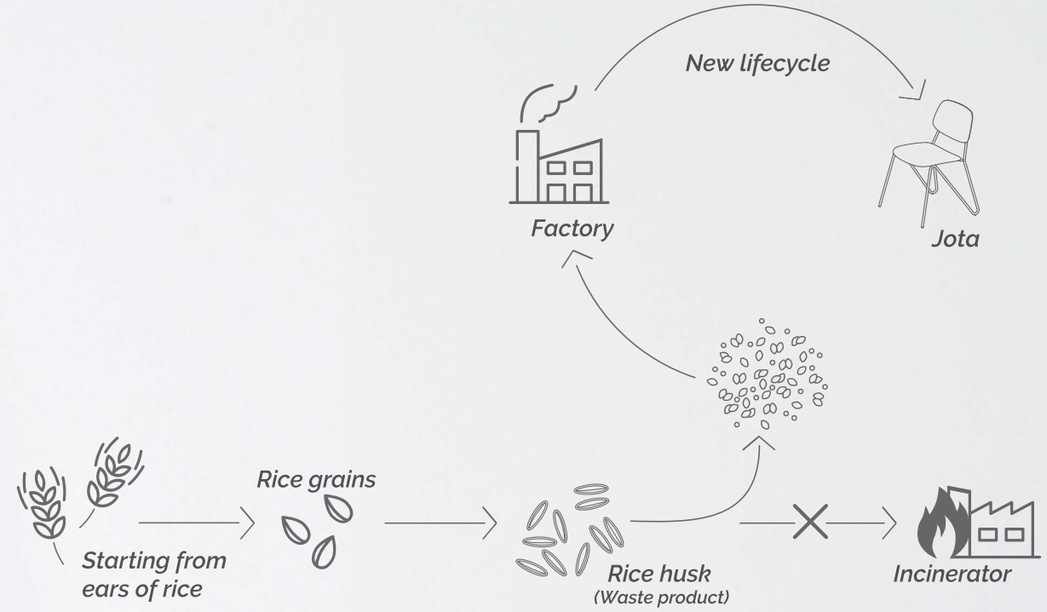

RECYCLED BIO-MATERIAL

Focus: materiali

La collezione Jota è disponibile anche in una variante con scocche realizzate in Bio-lolla, un innovativo blend composto da polipropilene e lolla di riso. Questo materiale consente quindi di dare nuova vita ad uno scarto di lavorazione, trasformandolo in una risorsa. La presenza di componente organica nel mix permette inoltre di ridurre l'utilizzo complessivo di plastica, contribuendo a un impatto ambientale più contenuto.

Il materiale risponde pienamente agli standard di qualità e sicurezza. Per la collezione Jota, le scocche in Bio-lolla sono disponibili esclusivamente nella finitura naturale, che esalta la peculiare texture materica della superficie.

Focus on: materials

The Jota collection is also available in a variant with shells made of Bio-lolla, an innovative blend composed of polypropylene and rice husk. This material thus allows a processing waste to be given new life, transforming it into a resource.
The presence of the organic component in the blend also allows the overall use of plastic to be reduced, contributing to a lower environmental impact.

The material fully meets quality and safety standards. For the Jota collection, Bio-lolla shells are available exclusively in the natural finish, which enhances the distinctive materic texture of the surface.
